COOKWARE

SINCE 1911

**LALLUBHAI
AMICHAND
LTD**

Lallubhai Amichand Limited was incorporated 105 years ago in the year 1991, for manufacturing of high quality, aluminium cookware and utensils. We started selling value added cookware in 1974 with our first production unit in Mumbai for the manufacturing of Pressure Cookers.

We used various media including hoardings, wall paintings, newspaper, radio and television media to popularize our brand so as to reach the maximum population. This helped us excel in production of Pressure Cookers paired with our high quality standards.

With the advent of modern cooking we introduced a non-stick range of cookware around 1985 setting up a full non-stick coating line in Mankhurd, Mumbai, by using 2 coat (wet on wet) non-stick coating of Weilberger, Germany known as 'Grelon'. Having tasted success in non-stick cookware range we further introduced premium non-stick cookware known as 'Black Beauty' range. Further, due to market demand we also developed hard anodized cookware range known as 'Silkon' range and set up an entire hard anodizing plant in our factory.

We were the first few companies to introduce professional marketing of the various ranges in cookware in 1990 by appointing a network of 40 distributors covering North, South and West of India and catering to more than 1500 dealers.

After achieving success in the above ranges, we imported a brazing machine from 'Dae-Sung' South Korea to manufacture stainless steel sandwich bottom/ induction based cookware in 1994.

We carried on the expansion of variety of cookware range throughout the 1990s and upto 2005. In 2005, we went for a major restructuring of business and shifted all our manufacturing activities to Ahmedabad until present date.
